- Unicode **OpenType PS & TrueType** for **Mac OS X** and **Windows**
- **Four weights:** regular, bold, italic, bolditalic
- **Slavic languages:** Russian, Ukrainian, Byelorussian, Bulgarian, Macedonian, and Serbian
- **Latin included:** Full West and East European character set included (like TCentral plus much more)
- The Unicode version of our popular “**Moskva**” typeface
- Supports the **historic orthography** of the Slavic languages
- For **Mac OS 9 & X, and for compatibility** with legacy documents “Moskva” continues to be available in an up-to-date version. OS X version also compatible with Windows for file exchange between platforms! Upgrade to “Moskva Pro” and the current version of “Moskva” will be supplied free of charge at your request.
